

Reduce Costs

Get Things Fixed Faster with Canopy

Canopy Can Help Reduce Costs by Reducing Downtime

Decrease expenses by improving operational efficiencies and increasing visibility into day-to-day processes. Predict failures before they occur and take preventative actions to protect your technology investments so they continue to run smoothly.

- Predictive analytics
- Real-time monitoring
- Customizable dashboards
- Remote command execution

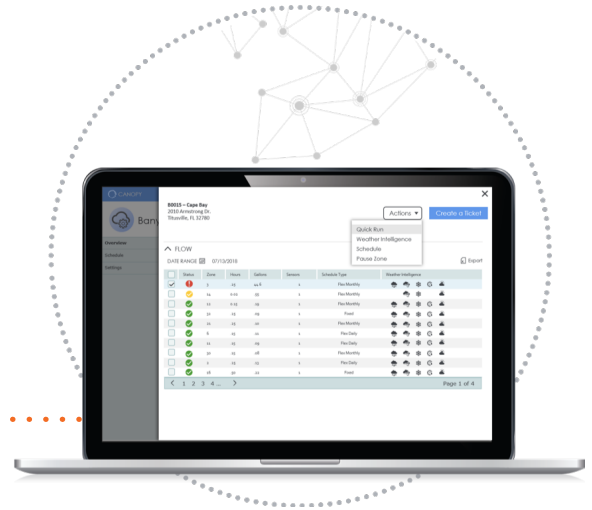

Decrease Expenses

Our Iot Platform Can Help You Lower Maintenance Costs

Canopy's customizable dashboards provide a central, real-time view of Key Performance Indicators (KPIs) showing the overall health and performance of your fleet of devices. If something goes wrong, you'll know. And, with remote command execution, you may be able to fix certain problems without the need to travel to the device location.

Preventative & Predictive Operations

Complex event processing for predictive analytics on data flowing through the platform.

Better Uptime

Address service issues before problems arise. Remotely control devices, and automatically trigger notifications.

Smarter Decisions

Manage the overall health of your devices through configurable KPIs that fit your business needs.
